CST INDUSTRIES AWARDED SUPPLY CONTRACT FOR LARGEST BOLTED TANK DIGESTERS IN THE WORLD

LENEXA, Kan. (October 31, 2013) – CST Industries has been awarded a project to produce four of the largest ever bolted tank digesters in the world in Thailand. As part of Thailand's requirement to substitute five percent of all fuel with biodiesel, these tanks will be installed at a bioethanol facility that utilizes molasses to crack biofuel.

Each of the four digesters will include pressurized free-spanning externally supported roofs (ESR's) and will store 15,000m³ of effluent. The digester tanks measure 37.5m diameter and 14.2m high, making them the largest bolted steel digesters ever constructed.

CST expects the storage tank and cover portion of the project to be completed in early 2014.

CST Industries is the largest manufacturer of bolted sectional panel tanks in the world. Recognized product brand names of CST Industries include: Aquastore, Tecstore, Columbian TecTank, Conservatek and Vulcan Tanks. CST Industries specializes in factory coated carbon steel tanks, including glass-fused-to-steel, modified thermo-set epoxy and hot dip galvanized, that range in capacity from 25m³ to over 45,000m³ of liquid storage. Additionally the company specializes in dry bulk storage silos, as well as tanks for use in the petroleum industry. CST Industries is the only tank manufacturer that also fabricates its own aluminum geodesic roofs. Currently more than 250,000 CST tanks are in service in over 125 countries throughout the world.
