

# Aquastore Tanks... Best For Meeting Your Immediate & Long-Term Needs

For water storage, you want the fastest construction, the best coating, the lowest maintenance, and the best life cycle cost. For all your water storage needs, the Aquastore glass-fused-to-steel tank offers all this and more.

**NEED WATER STORAGE FAST?**

- *Exceptional Service & Support*
- *Speed of Erection—In Service Faster*
- *Outstanding Economics*

# Ready For Your Increased Water Demand? The AQUASTORE Team Can Deliver

## The Best Coating

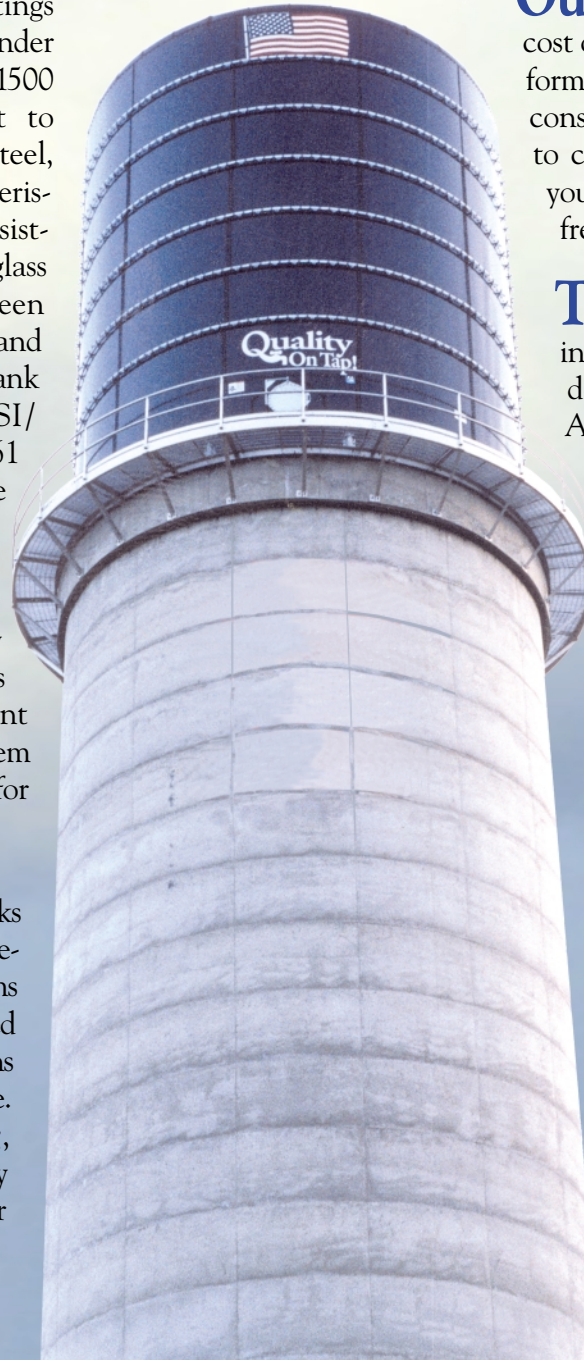

Aquastore glass coatings are applied in our ISO 9001 certified factory under optimum conditions. Fired at temperatures of 1500 degrees Fahrenheit to fuse the glass to steel, the physical characteristics and corrosion resistance of Aquastore glass coatings have been thoroughly tested and documented. Our tank systems are ANSI/NSF Standard 61 certified for potable water contact and conform to AWWA D-103 specifications.

Aquastore sheets are produced using our proprietary Edgecoat process, which thermal sprays the edges with a stainless steel alloy. Add our chlorine resistant sealants and you have a glass-fused-to-steel system designed for durability and minimal maintenance for the life of the tank.

## Fastest Construction

Aquastore tanks are well established in the water industry. Tight completion deadlines that would be impossible with other forms of tank construction become commonplace. Bolted construction can proceed in adverse weather conditions that would make welding and field-painting impossible. The tank foundation, Aquastore tank, piping, appurtenances and commissioning are typically completed in a fraction of the time required for other types of construction.

## Outstanding Economics

The low "Life Cycle" cost of an Aquastore tank will amaze you. Compared to other forms of construction, Aquastore glass-fused-to-steel tanks consistently have lower life cycle costs. No repainting, easy to clean, fast to erect—these and other features minimize your costs of ownership. Prove it to yourself—request your free copy of the Aquastore Life Cycle Analysis program.

## The Best Support

Your independent, authorized Aquastore dealer has full details on the Aquastore tank system, including Aquastore composite elevated tanks. Aquastore Dealers are available now to discuss your project requirements with sales, installation, and after sales service —the full package.
